v1.3

**L^AT_EX support files for Softmaker Stone
Handwriting available at
<http://www.freefont.de>**

August 16, 2010

Package author:
Josef Kleber

This package offers L^AT_EX support files for the Softmaker Stone Handwriting font available at www.freefont.de in June 2009.

These support files were created with the `installfont` bash script, which is available in CTAN.

Attention

This package does **not** include the fonts (license restriction). They are or were available for free download at www.freefont.de, as well as part of some font collections of [Softmaker](#).

1 Stone Handwriting (June 2009)

1.1 Package options

The font style file offers the following options:

1.1.1 scaled

You can use the option `scaled` for scaling the font to better match with other fonts, e.g. `\usepackage[scaled=1.03,leading=1.05]{iceberg}`.

1.1.2 leading

For some fonts it might be necessary to increase the leading between lines for a better optical impression, where 1.0 means 100%.

1.2 The Font

First of all, you have to get the font. Download it for free at www.freefont.de or get it from [Softmaker Handwriting](#). Afterwards, you must convert it to Postscript Type1, e.g. with Fontforge. Reencode the font to 'Adobe Standard' and generate it (PS Type1 (Binary)). Copy the Postscript Type1 font `StoneHandwriting.pfb` to your local \TeX tree:

```
TEXMF:/fonts/type1/softmakerfreefont/StoneHandwriting/
```

Family	Series	Shape(s)	Example of Typeface	Supported Encodings
Gsh	m	n	Stone Handwriting	OT1, T1, TS1
Gsh	m	sl	Stone Handwriting	OT1, T1, TS1
Gsh	m	sc	STONE HANDWRITING	OT1, T1, TS1

1.3 Installation

The following steps will show you the installation in the case of MiKTeX. For another \TeX distribution please take a look in its documentation.

- get [stonehand.tds.zip](#)
- extract it in the main directory of your local \TeX tree
- update the `FileNameDataBase (FNDB)` in MiKTeX Settings or with `initexmf -u1` on the command line

¹for system-wide installations you have to add the `--admin` switch

- include the map file
 - run `initexmf --edit-config-file updmap`
 - add `Map stonehand.map` in the opening editor
 - save the file and close the editor
 - run `initexmf --mkmaps`

1.4 Usage

If you want to typeset your complete document with the font Stone Handwriting simply add `\usepackage{stonehand}` to your preamble. If not, simply add another font package after `\usepackage{stonehand}`. You can switch to the font Stone Handwriting with the command `\FFStoneHandwriting`, which is a shortcut for:

```
\fontfamily{6sh}\fontseries{m}\fontshape{n}\selectfont
```
